PROTECTED PERSONNEL CARRIER

PLATFORM: MERCEDES SPRINTER EXLWB SUPER HIGH ROOF

Our PPC product have been developed to meet the needs of police forces looking for a product that can move personnel and equipment safely in one vehicle.

The composite body, which has undergone dynamic testing, offers an increased payload and a larger internal volume. It enable the users to store the appropriate equipment they need to carry out their job in one place safely – rather than looking to an additional support equipment vehicle for assistance.
